ABOUT ME

B.Sc. Cyber Security student at Guru Nanak Institute of Technology (MAKAUT) with a strong foundation in cybersecurity, cryptography, networking, and programming. Passionate about information security, secure software development, and ethical hacking. Seeking opportunities to apply technical skills in cybersecurity and software development environments.

EDUCATION

BSc in Cyber Security
■ Gurunanak Institute of Technology
■ MAKAUT · 2024 – 2028 (Ongoing)

WBCHSE (Class XII)
■ Uttarpara Girls High School
■ 2022 – 2024 · 81%

TECHNICAL SKILLS

Programming Languages
■ Python
■ C
■ C++
■ JavaScript (Basic)

Frontend Development
■ HTML5
■ CSS3
■ JavaScript
■ Responsive Web Design

Cyber Security
■ Cryptography Fundamentals
■ Ethical Hacking Concepts
■ Network Security Basics
■ Password Security Analysis
■ Vulnerability Assessment (Beginner)

Database & Tools
■ MySQL
■ Git
■ VS Code

SOFT SKILLS

■ Analytical Thinking
■ Adaptability
■ Team Collaboration

LANGUAGES

English — Fluent ★★★★★
Bengali — Fluent ★★★★★
Hindi — Basic Conversational ★★■■■

PROJECTS

Password Strength Analyzer
Python · Flask · HTML/CSS/JS · HIBP API

- Built a full-stack web app that evaluates password entropy and scores strength across multiple security parameters in real time.
- Integrated Have I Been Pwned (HIBP) k-anonymity API to detect compromised passwords without exposing user data.
- Implemented a cryptographically secure password generator and a per-IP rate limiter via a Python Flask backend.
- Designed a cyberpunk-themed responsive UI with vanilla HTML/CSS/JS for enhanced user experience.

Text Encryption & Decryption Tool
Python · Cryptography Libraries

- Built a Python application for secure text encryption and decryption using established cryptographic techniques.
- Applied symmetric and asymmetric ciphers to protect sensitive information in transit.
- Designed an interactive GUI for smooth encryption/decryption operations.

Image Encryption System
Python · PIL / OpenCV

- Developed a secure image encryption solution implementing pixel-level encryption and decryption for image files.
- Focused on confidentiality and secure file handling practices, ensuring data integrity throughout the process.

Portfolio Website
HTML5 · CSS3 · JavaScript

- Built a responsive personal portfolio to serve as a central hub for professional identity and project showcases.
- Created an interactive frontend with structured layouts, optimized navigation, and custom UI themes.

CERTIFICATIONS & JOB SIMULATIONS

- **Cybersecurity Analyst Job Simulation** — Tata Group · Forage (2024)
- **Cybersecurity Analyst Job Simulation** — Deloitte · Forage (2024)

Currently pursuing: CompTIA Security+ / Google Cybersecurity Certificate

PUBLICATION

[In Preparation — IEEE Submission Expected 2025] *"EPQ-SDT: An Edge-Assisted Post-Quantum Secure Data Transmission Framework for IoT–Cloud Systems" — IEEE Research Paper*

Relevant Coursework: Cryptography · Network Security · Ethical Hacking · Data Structures · Operating Systems · Database Management
